Before booking: Check the Capital One Travel Portal price. Check airline loyalty programs. Compare hotel loyalty programs. Calculate your points value. A redemption that looks attractive may not always be the best option. Strategy 2: Use Points for Expensive Travel The best value often comes from using points for expensive purchases. Advanced travelers often use transfers for: Business class flights First-class cabins International routes Premium flights usually have expensive cash prices, but transferring points can make them more valuable. Example: A business class ticket may cost: \$4,000 cash but require: 80,000 airline miles This creates a much higher value compared with purchasing economy flights. every redemption provides good value. The purpose of travel rewards is usually to reduce travel expenses or improve travel experiences. Strategy 5: Book Flexible Travel Dates Travel flexibility can significantly improve your points value.
